

# MODERNIZATION

CONTINUALLY IMPROVING PROCESS AND TECHNOLOGY

Through Project MYNT, the Department will launch a modernized tax environment. Modernization efforts will optimize data access and response time to better meet the needs of all who rely on the revenues collected and distributed by the Department.

The improvements to process and technology will enable the Taxation workforce to:

- Improve user experience for taxpayers and other stakeholders
- Employ existing and modernized resources to provide responsive data in the ever-changing information landscape
- Support sustainable and adaptable technology development

The resulting environmental conservation, includes:

- Emission (carbon) reductions across production life cycles
- Energy savings
- Paperless initiatives
- Research perspectives
- Fiscal savings
